(54) **Multiuse reactive-plate for analysis, particularly for direct analysis of whole blood or fluids containing any kind of particles or fragments**

(57) The present invention relates to a multiuse reactive-plate (1) for analysis, particularly for direct analysis of whole blood or fluids containing any kind of particles or fragment, comprising a first element (2) or lower sector, a second element (3) or intermediate sector and a third element (4) or upper sector, all the above elements being made up of transparent material, said first element (4) providing a lower suction central hole (5), coupling means (6) provided with drawing system (8), a chamber (9) communicating with said central hole (5), an unidirectional valve (7) for the passage of the sucked fluid toward said second (3) and third (4) elements; said second element (3) providing a plurality of channels (11) communicating between said first element (2) and the lower half of a plurality of reaction wells (12), within which the diluent is provided; said third element (4) providing a number of half wells (12) corresponding to the number provided in said second element (3), within which the reactive (12) is provided, channels (17) communicating between said half of reaction wells (12) and a central hole (13), in correspondence of said central hole (13) coupling means (14) provided with sucking system (15) being provided; said first element (2) being fixedly coupled with said second element (3); said second element (3) and said third element (4) being coupled having their faced surfaces adhering, but in such a way to be able to rotate each other between a rest position, wherein the respective halves of reaction wells (12) do not correspond and an activation position, wherein the relevant halves of the reaction wells (12) correspond.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 99 83 0304

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
